

Tabela 9. Resultado do teste de progénie para produções de leite, gordura, proteína e sólidos totais, e para percentuais de gordura, proteína e sólidos totais no leite, e genótipos para Beta-caseína, Kappa caseína e Beta lacto-globulina, e coeficiente de parentesco médio para os diversos grupos de touros, classificados pela PTA para leite.

| Class. | Grupo | RGD | Nome | Touro | | | | | Produção de leite | | Produção e % de Gordura | | Produção e % de Proteína | | Produção e % de Sólidos | | Parentesco Médio (%) | | | | | | | | |
|--------|-------|------------|---------------------------|-------|--------------|---------------|----------------------|--------------------|-------------------|----------------|-------------------------|-------|--------------------------|-------|-------------------------|-------|----------------------|--------|--------|------|------|--------|--------|-------|------|
